EDUCATION

SASTRA Deemed to be University | Thanjavur, India

Oct 2022 – May 2026

Bachelor of Technology in Computer Science & Engineering (IoT and Automation)

WORK EXPERIENCE

Agentic AI Engineering Intern | Glacis

Apr 2026 – Jun 2026

- Built a **91-node n8n automation platform** with **5 event triggers**, integrating **HubSpot, Slack, Calendly, Dripify, Instantly**, and **DocSend** to automate end-to-end **GTM and CRM workflows**.
- Designed a **JavaScript event normalization pipeline** using **REST APIs** and webhooks to standardize 7 webhook formats into 30+ event types, enabling scalable workflow orchestration and analytics.
- Developed an **AI-powered lead qualification engine** using Google Gemini, integrating API workflows, CRM synchronization, lead enrichment, campaign attribution, and **human-in-the-loop Slack automation**.

Oracle APEX Developer Intern | Virran Tech Solutions Pvt Ltd.

Jun 2025 - Jul 2025

- Built a **12-module Leave Management System** using **Oracle APEX (auth, dashboards, workflows, reports)** in 4 weeks, streamlining **end-to-end HR operations**.
- Automated **leave balance calculations** and **approvals** using **PL/SQL**, reducing manual effort, processing time, and human errors and implemented **RBAC** and **interactive dashboards** for secure, real-time visibility of employee leave data.

PROJECTS

BioGraphRAG (GraphRAG-based Biomedical Discovery System) | [Github](#) | [Live Link](#)

Feb 2026 – March 2026

Tech Stack: FastAPI, NetworkX, ChromaDB, Hugging Face, Llama 3.3 (Groq), JavaScript, Vis.js

- Built a hybrid **GraphRAG** platform integrating **NetworkX knowledge graphs** with **ChromaDB** vector search for **multi-hop biomedical reasoning** and **drug repurposing retrieval**.
- Developed a **FastAPI backend** with **Llama 3.3 (Groq)** for evidence-grounded answer generation and automated fact-checking against **PubMed citations**, delivering sub-second response latency with resilient fallback generation.

FashionSense AI (Multilingual Review Intelligence Platform) | [Github](#) | [Live Link](#)

Mar 2026 – April 2026

Tech Stack: AWS (S3, Translate, Comprehend, Bedrock, EC2), FastAPI

- Built a **multilingual NLP pipeline** supporting **9 Indian languages** for aspect-based sentiment analysis, SKU-level return risk prediction, and customer insight extraction.
- Engineered an **AWS-powered inference pipeline** using **Amazon Translate, Amazon Comprehend, and Amazon Bedrock (Nova)**, reducing API costs by **96%** while generating LLM-driven summaries and supplier recommendations.

Dual Stream Deepfake Detection Network | [Link](#)

Jan 2026 – May 2026

Tech Stack: Python, TensorFlow/Keras, OpenCV, NumPy, Matplotlib

- Designed **DFCA-Net**, a dual-stream deep learning model combining **MobileNetV2, DCT-based frequency features**, and **cross-attention** for robust deepfake face detection.
- Trained and optimized the model on **140K real and fake face images** using **mixed-precision training** and **NVIDIA DGX A100 GPUs**, achieving **98%+ accuracy** and **near-perfect AUC**.

College Bus Tracking System (IoT + MERN Stack) | [Github](#) | [Live Link](#)

Jul 2025 – Nov 2025

Tech Stack: ESP32, Neo-6M GPS, Node.js, Express.js, MongoDB, React.js

- Built an **IoT-based fleet tracking system** using **ESP32, Neo-6M GPS, React, Node.js, Express.js, and MongoDB** for real-time vehicle tracking with sub-2 second location updates.
- Designed **RESTful APIs** and optimized **MongoDB** schemas for efficient GPS data storage, route tracking, and dynamic ETA prediction through an interactive dashboard.

SKILLS

- Programming Languages:** C, C++, Python
- Web Development:** HTML, CSS, JavaScript, React.js, FastAPI, RESTful APIs
- Database Management:** MySQL, PostgreSQL, ChromaDB, PL/SQL
- Cloud & AWS:** Amazon S3, Amazon Bedrock, Amazon Translate, Amazon Comprehend, EC2
- AI Automation:** n8n, AI Agents, Agentic AI, LLMs, RAG, GraphRAG, Prompt Engineering, LangChain, LlamaIndex, MCP, Vector Databases
- Machine Learning:** Deep Learning, Computer Vision, Natural Language Processing (NLP), Transformers, Transfer Learning, Fine-Tuning, Feature Engineering, Model Evaluation
- Tools & Platforms:** Git, GitHub, Docker, PyTorch, TensorFlow/Keras, Scikit-learn, Pandas, NumPy, Hugging Face, Postman, Oracle APEX
- Core Concepts:** Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Data Structures (DSA), OOPs

ACHIEVEMENTS AND CERTIFICATIONS

- Top 15 Finalist –Amazon AI Hackathon** | **OCI AI Foundations Associate (Oracle)** | **Generative & Responsible AI (Google)**
